

Steel Property Chart - 1

WEAR RESISTANCE

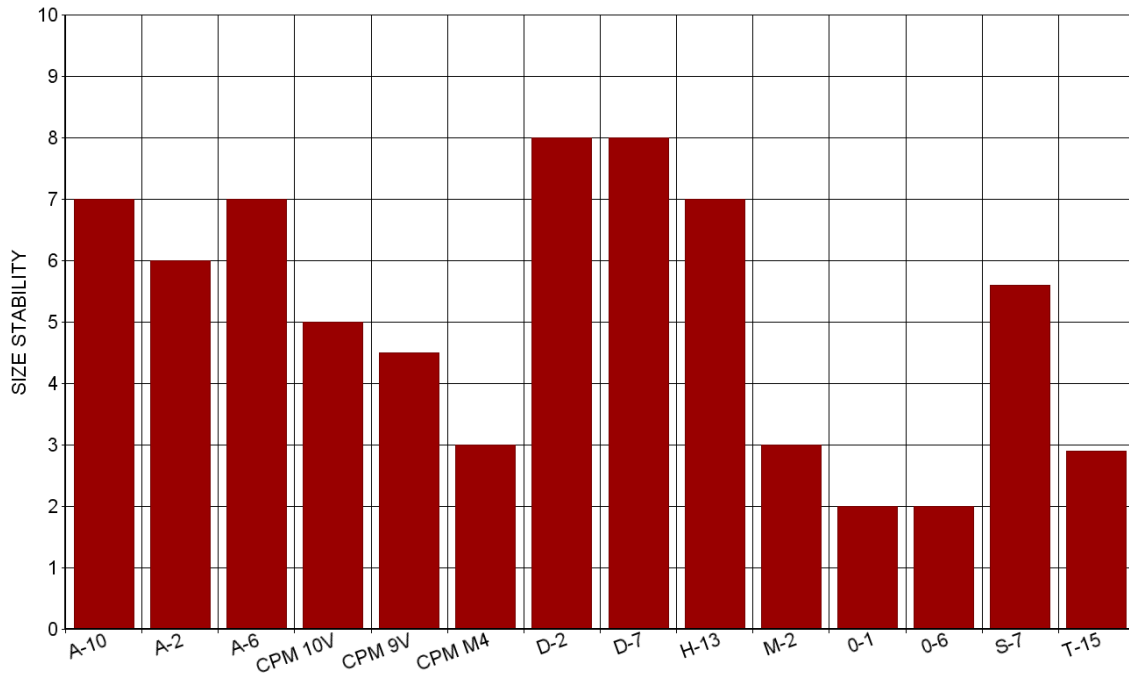

TOUGHNESS

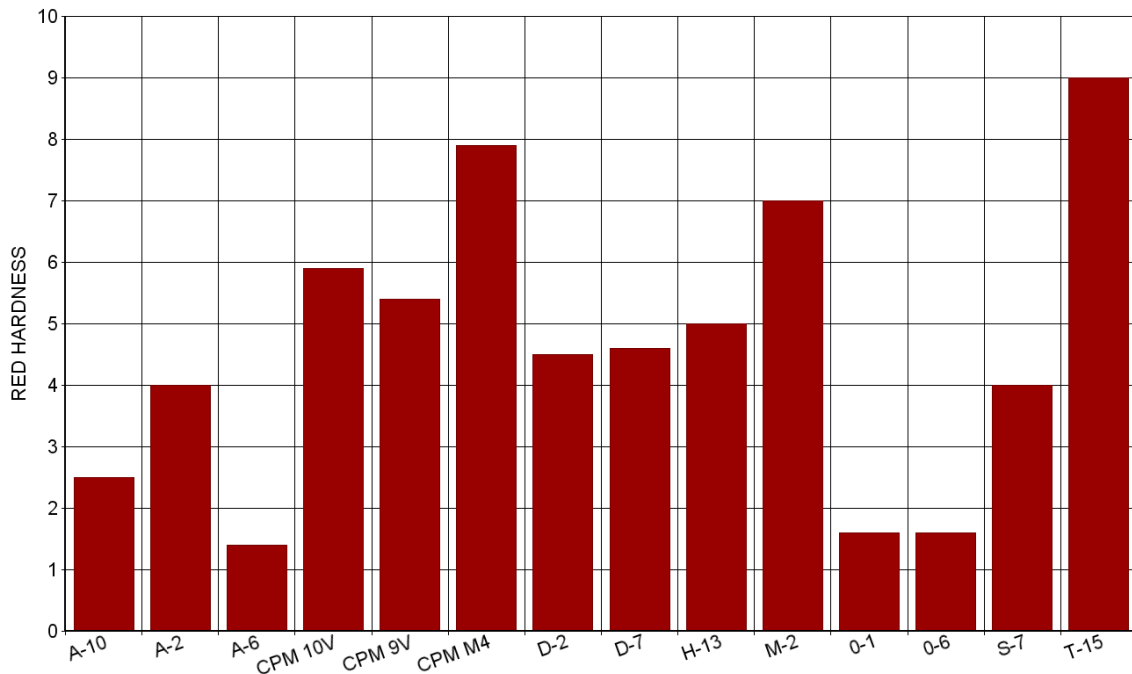

Note: The above data is typical information for each category, not actual values. Tool engineers and designers should analyze each application and technical information independently.

Steel Property Chart - 2

SIZE STABILITY

RED HARDNESS

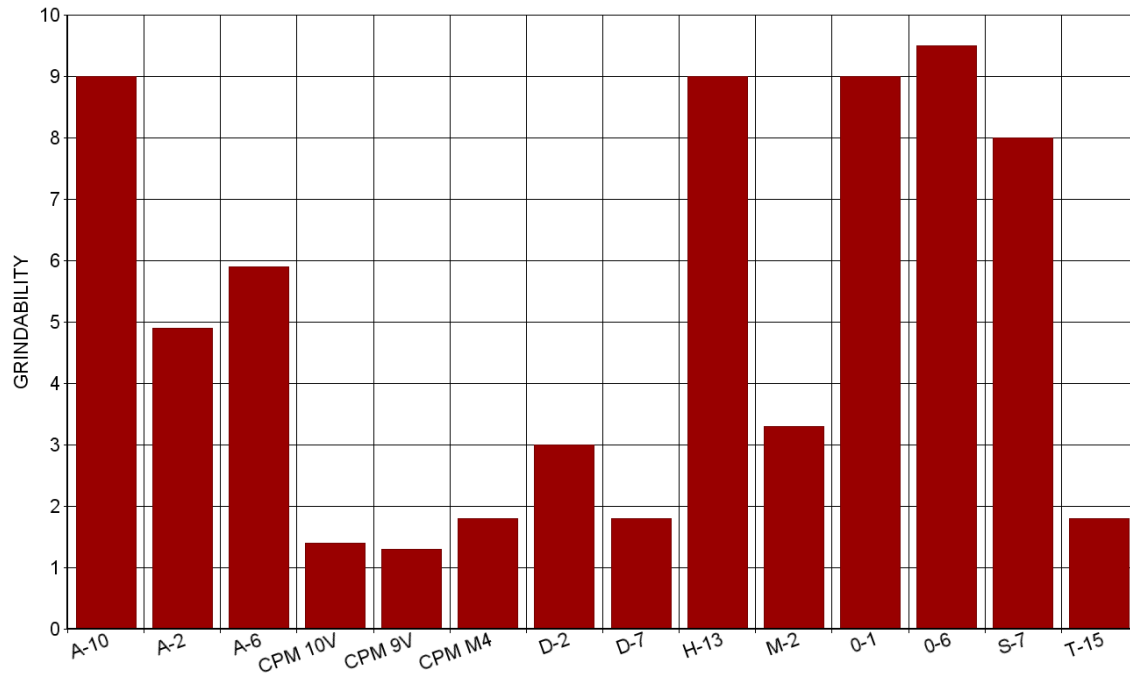

Note: The above data is typical information for each category, not actual values.

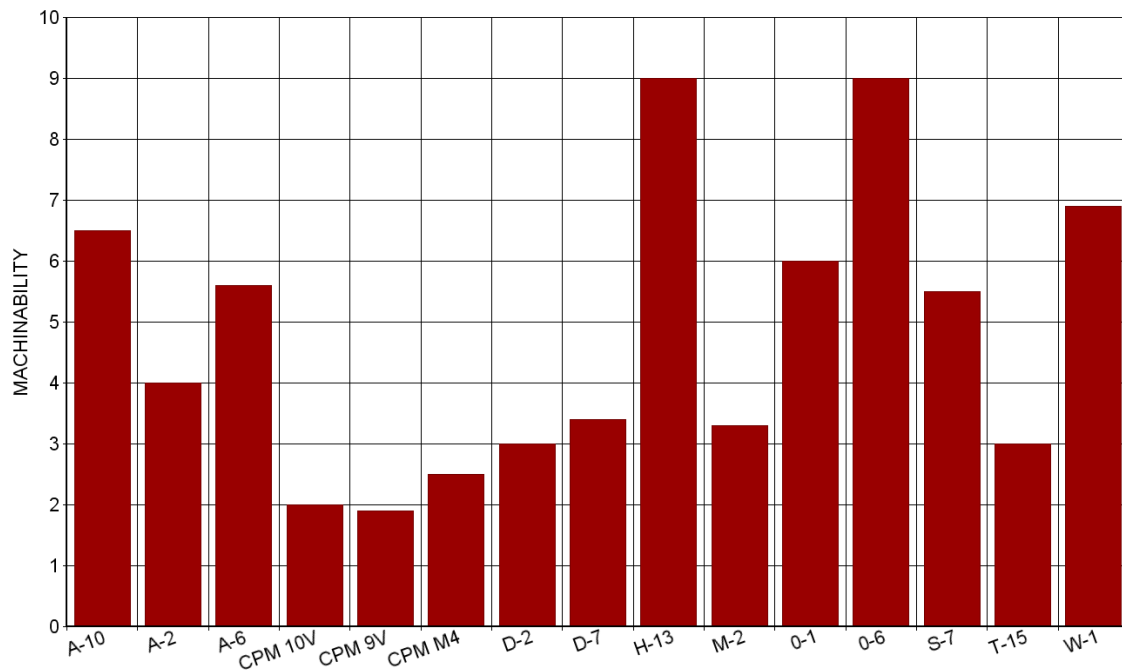

Tool engineers and designers should analyze each application and technical information independently.

Steel Property Chart - 3

GRINDABILITY

MACHINABILITY

Note: The above data is typical information for each category, not actual values.

Tool engineers and designers should analyze each application and technical information independently.
